PUSH FORWARD!

PROPER
PRINTING

Team spirit in a new dynamic

Flexopack has a clear objective as a medium-sized family-owned business: to achieve flexo print results of the very best quality and individual customer requirements better than the competition. A superbly compatible team of over 50 employees supports you with total motivation and commitment. They not only do what is asked, but also use their experience to develop creative solutions.

What applies to the customer relationship also has priority for the company's own employees: a human, harmonious togetherness. Reliability, directness and continuity in the workforce form the basis of high-quality work and innovative solutions. In times of increasing market demands and extreme competition, it is not only the quality that matters - to be successful on the market, it is always more important to be quicker than the others. And that's what makes us proper printers.

At Flexopack, a new speed of quality means:

- Fast, quick decision-making channels in a family-owned enterprise
- Committed, independent employees
- Appreciation of customers and colleagues
- State-of-the-art, powerful flexo printing technology
- Innovative product diversity
- Highest quality standards in the overall process
- Individual solutions
- Fast and flexible for short-notice orders

Technology on a new level of performance

Five flexo printing machines, each with 8 colour decks - in short words, that's what Flexopack has to offer you. The flagship of the machine fleet is a W&H NOVOFLEX flexo printing machine: max. print width 1,650 mm, max. print length 1,250 mm. This system is noted for efficient production combined with maximum quality. Four additional 8-colour machines with different printing widths also enable the economic production of smaller batch sizes with a high quality standard. In order to supply appropriate products to our customers, three slitting lines are available. This is how we achieve packaging solutions to suit our customers' products.

Flexopack is quick - and sustainable as well. An innovative building technology system ensures the efficient use of energy and resources, thereby guaranteeing a high standard of hygiene.

Flexopack delivers maximum quality in record time:

- Latest printing plate technology for the highest quality printing results
- Automatic ink-formulation and -dispensing system with modern colour measurement and colour composition for accuracy and reproducibility.
- Use of high-grade printing inks and varnishes
- Food safety standard ISO 22000
- Quality certification ISO 9001
- 100% quality control and print monitoring

Individual product solutions of the highest quality

Flexopack specialises in the printing and processing of flexible packaging materials - e.g. paper, PP, PE and PET films as well as composite materials.

Processing takes place from roll to roll, the customer uses the printed and slitted rolls in his packaging or further processing systems.

Thanks to its high hygiene standards and experience, Flexopack can count notable industrial enterprises amongst its long-standing customers.

Product examples:

- Flexible packaging for food and non-food products
- Packaging for industrial goods (e. g. wrappers for office paper)
- Packaging for the tobacco industry
- Preprint for the corrugated board industry
